

environmental impact assessment

JANUARY 2006

tda environmental consulting Pty Ltd began in Sydney in 2000 and now conducts environmental impact assessment throughout Australia. Through its involvement in corporate environmental management and an active focus on the property and civil infrastructure markets tda has a national presence delivering services to its clients in all states.

tda is committed to supplying metropolitan and regional centres with high quality environmental services and working with developers, local, state and federal government to enhance and improve the development process.

Project experience

The following keystone projects from 2005 highlight the experience and expertise of tda in the field of environmental management. These environmental solutions demonstrate the ability of tda to offer innovative tailored services to a diversity of clients.

- **BioIndex** - Development of a biodiversity evaluation tool (bioindex) for new Biobank initiatives with NSW Department of Environment and Conservation (DEC);
- **Import Risk Assessment** - Formulation of risk assessment protocols for live species import in association with Australian Quarantine and Inspection Services and Commonwealth Department of Environment and Heritage;
- **Film Management Protocols** - Working with the NSW Film & Television Office and NSW National Parks & Wildlife Services (DEC) developing environmental management protocols for location filming;
- **Whole Building EMS** - Working with DEC and the Green Building Council in developing sustainable environmental management initiatives for commercial tenants and property owners;
- **EIA** – Complete environmental impact assessment and project management for various projects, including mining and development.

Environmental Impact Assessment

tda environmental consulting Pty Ltd understands that our clients come to us for a range of reasons, to protect a variety of natural ecosystems, and to seek compliance from a host of different authorities.

A brief list of the environmental impact assessment services tda is able to offer our clients include:

- Project management of Environmental Impact Assessment, including preparation of REFs, SEEs and EISs
- Fauna & flora surveys, including Seven Part Tests of Significance and species impact statements
- Liaison and negotiations with environmental, conservation and government authorities
- Opportunities and constraints analysis
- Expert witness testimony
- Advice regarding Commonwealth and State threatened species legislation

- Formulation & implementation of recovery plans
- Pest species management
- Wetland and dam management and design
- Site rehabilitation
- Feasibility and viability studies
- Land capability assessments
- Environmental policy development
- Waste management plans
- Environmental management system development
- System auditing
- Mining operation plans

Whatever the nature of your project, tda is able to provide all of the required services to carry out an effective Environmental Impact Assessment.
